PERSONAL CARE

Our BIOS Living disposable underpads offer superior protection and absorbency for both individuals and surfaces. Crafted from super absorbent polymer (SAP) and fluff pulp, they effectively prevent leakage and reduce odors. These underpads are disposable, multi-purpose, leak-proof, and latex-free.

Tested and proven against the top 5 national brands, BIOS Living is the preferred option for high absorbency and prevention of rewetting. Based on test results and analysis by **Intertek** Testing Service Ltd, BIOS Living demonstrated the highest scores among the five brands. BIOS Living emerges as the superior choice, exhibiting high total absorbency and rate, good rewet resistance, effective coverage diffusion, and fast absorption speed, making it the preferred option for effective management and prevention of rewetting.

Compression Garments

BIOS Living Compression Stockings & Socks are designed to meet the lifestyle needs of most compression therapy patients. The compression garments are available in two graduated compression levels 15-20 mmHg and 20-30 mmHg. Made with high quality yarns to provide compression therapy for prevention and mild treatments. Medical grade compression stockings and trouser socks for support all day, every day. All 3 of our styles - men's trouser socks; women's knee high stockings; and women's panty hose energizes the legs when sitting or standing for long periods of times. Suitable for prolonged travel and helps to relieve swollen, achy and tired legs. All our compression garments are latex free and come in 3 sizes medium, large, and x-large.

Light compression - 15-20 mmHg: provides support that's ideal for all day, everyday wear, alleviates swelling, pain and achiness, great for travel, long periods of standing/sitting, and pregnancy. 15-20 mmHg is the most commonly used compression level.

Medium / Moderate compression - 20-30 mmHg: provides support that's commonly recommended for Edema, Deep Vein Thrombosis (DVT), pre and post-surgical procedure, blood clot prevention and moderate venous insufficiencies. Most frequently prescribed by a doctor for these types of conditions.

The mmHg number indicates the amount of pressure. The higher number indicates the pressure on the ankle, while the lower number indicates the pressure on the calf.

Reinforced Toe
Fits better, designed for lasting durability

Comfort Toe
Roomy closed toe box will not compress toes and eliminates pressure

Elastic High-Quality Fabric
80-85% Nylon, 15-20% Spandex

Diabetic Socks

BIOS Living Diabetic Socks are made without top elastics that can cut off circulation and restrict blood flow to the feet, they have the ability to stretch and fit most calf sizes without binding and restricting circulation in the leg.

These socks are knitted with moisture wicking special yarns to wick moisture away from the skin. They are also treated with anti-microbial technology to prevent the growth of bacteria and fungi in the moisture prone regions of the foot, keeping it healthy. It is vital to keep the foot dry and avoid moisture collecting on the foot so as not to encourage bacterial growth; extra moisture can lead to infection.

Easy to put on and take off for both young and elderly people. These socks are seamless, which will not cause any irritation. They are knit with a flat smooth toe seam as opposed to the raised sewn seams found in ordinary socks which could cause chafing and abrasion.

BIOS LIVING SHIPPING GUARANTEE

Your orders are important to us. We want to ensure that your items arrive at your destination in the shortest amount of time. This is why we have created the BIOS Living Shipping Guarantee. We guarantee your order will ship within 2 business days of receipt of order.

Business days are Monday through Friday, excluding holidays. Shipping guarantees apply to in stock items only. You will be notified upon receiving your order if the items you have purchased are out of stock. If there are questions or issues concerning your order that require your response, the 2 business day shipping guarantee may not apply.
